

Description:	Alana Dining Chair	Model Number:	HC5101-D	COM YDS:	1.25
Width:	24	Seat Depth:	19	Seat:	.55
Depth:	25	Seat Height:	19	Inside Back:	.35
Height:	37 1/2	Arm Height:	26	Outside Back:	.35
Seat Width:	19 3/4	Weight:	27 lb		

Frame:	Frame is constructed from solid European Beech. Mortise & tenon joinery provides long-lasting durability. Tongue and groove corner block system where legs meet seat rails for added strength. Joints are re-enforced with glue and heavy-duty wood screws. Frames are hand-sanded prior to finishing for a superior look and feel.
Seat Deck:	Seat deck comprised of a solid laminated plywood panel and sheet webbing.
Seat Cushion:	Tight seat comprised of 1.85 density 55 lb. foam with Dacron fiber.
Back Cushion:	Tight Back
Glides:	Teflon (standard), metal (optional) and felt (optional) -Contact flooring manufacturer for glide compatibility recommendations.
Casters:	Available with 2 front casters or 4 casters.
Caster Finishes:	Antique Brass and Brushed Nickel
Finish:	8-step process that transforms the raw wood into a visually stunning piece that is highly durable and ready for years of use. Based on crosslinking urethane resins, the coating forms an incredibly tough and chemically resistant film that outperforms catalyzed solvent finishes without any of the environmental drawbacks. The coating is impermeable to water and is not affected by alcohol, coffee or many of the harsh cleaners used in commercial settings such as mild peroxides, diluted bleach and ammonia-based disinfectants. See website for color options.
Warranty:	Frame, Foam & Deck Materials – 5 Years Casters – 2 years

Refer to the price list or website for further details and options.
